x	24042	Where can I find information about cell phone safety concerns?	Admin (Parature)	11/22/2006	46%	303	31689	Published	Non-Ionizing Radiation	associated with radiofrequency (RF) radiation exposure from cell phone use. While some studies have shown a correlation between the occurrence of certain adverse health effects and long-term use, a definitive cause and effect relationship has not been established. The Federal Communications Commission (FCC) has adopted exposure limits to RF energy with
x	14214	Are there regulations concerning radiation emissions from power lines?	Admin (Parature)	11/22/2006	47%	271	18630	Published	Non-Ionizing Radiation	residential or occupational exposure to electric and magnetic fields (EMF) from power lines. However, some states have set standards for transmission line fields. Along with more information on EMFs, the National Institute of Environmental Health Sciences' EMF Q&A pamphlet (PDF, 65pp, 11.45Mb) provides information about state standards. Additional
x	24077	Where can I find information about living near a cell phone tower?	Admin (Parature)	11/18/2004	47%	278	17602	Published	Non-Ionizing Radiation	regulates systems such as cell phone towers. Exposure levels from cell phone towers must comply with the FCC's radiofrequency (RF) radiation exposure guidelines, which were developed to protect the public from RF-related health risks. You can find more information about cell phone tower siting on the FCC Tower and Antenna Siting Issues page. Additional
